DeBug!

Made by Celeste Wu, Sophia Park, and Avery Clowes

To run this code

1. Download the zip file
2. Open it to a new source file of the project you want to edit.
3. Take all of the images, text files, and sounds out of the source folder and into the main sub folder

        Ex. User/eclipse-workspace/ProjectFilename/ instead of
        User/eclipse-workspace/ProjectFilename/src/package/

4. In eclipse, run the class DrawingFrame
5. Play the game
